ALPHAЕON COMPLETES ENROLLMENT IN US PIVOTAL TRIALS FOR EVOLUS NEUROMODULATOR

Irvine, Calif., April 24, 2015 – ALPHAЕON Corporation announced today that they completed enrollment of two pivotal studies with their Botulinum toxin Type A neuromodulator, EVOLUS™, for the treatment of glabellar lines. Completing enrollment marks a significant milestone for the Phase III development program. Recruitment for the two U.S.-based studies began on January 2015 and was completed in March.

“We have been fortunate to partner with some of the top dermatologists and plastic surgeons in our clinical studies. Their research experience and clinical acumen was evident during this important enrollment phase of our pivotal trials,” said Chris Marmo, Ph.D., President of ALPHAЕON Beauty.

ALPHAЕON acquired the exclusive U.S. and certain international distribution rights to the neuromodulator as part of its acquisition of Evolus Inc. in October of 2013.
