ALPHAЕON Announces Plan to Acquire Integrity Digital Solutions

Irvine, Calif., November 12th, 2015 - ALPHAЕON Corporation today announced its plan to acquire Integrity Digital Solutions LLC, for an undisclosed sum. The consummation of the acquisition is subject to requisite approval from both companies and the satisfactory completion of certain closing conditions. The transaction is expected to close on or before December 31st 2015.

“Integrity is an innovative EMR platform and a great addition to the ALPHAЕON Suite, our practice system designed to enhance the patient experience and drive practice success,” said Robert E. Grant, CEO of ALPHAЕON. “We believe that with this acquisition we can offer physicians the most comprehensive integrated offering for their practice.”

Integrity is an innovator in EMR software delivered on an efficient cloud-based platform. Developed from the ground up by ophthalmologists, Integrity is designed to expedite EMR implementation while providing a product that enhances patient care.

“We chose Integrity as our EMR platform because it’s simple and intuitive to use,” said Kerry Solomon, MD, of Carolina Eyecare Physicians who also is an equity holder in and a member of the board of directors of Integrity. “The platform significantly reduces the time I spend interpreting work ups and has optimized my reimbursement. As I lean heavily on Integrity and now ALPHAЕON, I’ll be able to spend more time with patients and less time on back-end operations.”

“ALPHAЕON expands access for our physicians to a broader portfolio, additional resources and rapid innovation,” said Chris Moore, CEO of Integrity Digital Solutions. “We truly believe that together we will be able to continue to offer innovative solutions and best-in-class service to our physicians and their patients.”

About Integrity Digital Solutions, LLC

Integrity Digital Solutions, LLC is an innovator in EMR software for ophthalmology and optometry. Developed from the ground up by ophthalmologists and optometrists, Integrity EMR for Eyes™ is designed to expedite EMR implementation while providing a product that enhances patient care.
