TODAY'S HEALTHCARE SITUATION

Let's face it. The current healthcare system is in need of a major adjustment.

You're a busy executive, you want to see a doctor, and it often takes over two months to get in to see an elite specialist, and once you arrive, it's more paperwork, and more waiting.

Conveniences exist in almost every other industry you experience – including airline clubs, preferred hotel status, even premium credit cards. These all exist so you can go to the front of the line, enjoy a higher level of service, and make the best use of your time – but what about your medical experience?

SOLUTION

A CONCIERGE KEY Health membership is the first mobile app to give you fast-pass access to in-person, on-demand visits with an elite team of highly qualified, faculty-level doctors assigned to look after you. It includes specialists, urgent care, and hospital clinics across the U.S.

With your personalized team of elite doctors around you, you no longer have to feel alone in your healthcare journey.

ELITE TEAM OF DOCTOR SPECIALISTS

Unlike most concierge medicine programs that provide access to only ONE doctor's care, CONCIERGE KEY Health provides access to your own team of elite doctors, no matter where you go.

CONCIERGE KEY enables members to expedite their visitation with an elite doctor across the healthcare spectrum, each board-certified within their specialty and peer-vetted as members of the highly exclusive, World Physicians Organization, the only global cross-specialty physician faculty membership organization.

HOW IT WORKS

Upon arriving at the medical office, scan your app on the waiting room kiosk, and you're quickly escorted to a private exam room. The doctor and staff are ready, your insurance information is on file, and your health profile is securely embedded in the app and available to the doctor – avoiding unnecessary paperwork.

When you're finished, you've had a premium experience, can leave the office without delay, and get back to your busy life.

Becoming a CONCIERGE KEY Health member is easy.
